Revision Tracking

B2B Quote Documentation · /b2b-quote/features/revision-tracking

Revision tracking creates snapshots when a quote changes, so you can see what changed over time and how the quote evolved during negotiation.

What Gets Tracked

Common changes that create revisions:

- Item price changes
- Quantity changes
- Status changes (depending on configuration)
- Customer submissions/acceptance (depending on configuration)

Configuration

Enable and tune retention:

- `b2bquote/revision/*`

Key settings:

- `b2bquote/revision/enabled_events`
- `b2bquote/revision/cleanup_enabled`
- `b2bquote/revision/cleanup_days`

See:

- [Settings Reference](#)
- [Cron Jobs](#)

Screenshot placeholder: quote history / revision timeline
