Configuration Fields

This reference lists the settings exposed by `mageb2b/bulkgood` in Magento Admin.

Configuration paths are included for controlled deployments and `config:set`. Use Magento Admin for normal changes so field validation and scope inheritance still apply. The extension status display is not listed because it reports installation state rather than a configurable value.

Table Rates

Shipped defaults: all three price sources are enabled in the priority list (country price → product price → table rate), **Price Calculation Method** is *Highest*, **Calculate Bulkgood Price by Qty** is Yes and logging is off.

Field	Configuration path	Input	Scope
Bulkgood Price Source Priority	<code>carriers/ablerate/bulkgood_price_priority</code>	Custom control	Default, Website, Store view
Price Calculation Method	<code>carriers/ablerate/price_calculation_method</code>	Select	Default, Website, Store view
Calculate Bulkgood Price by Qty	<code>carriers/ablerate/calculate_by_quantity</code>	Select	Default, Website, Store view
Enable Bulkgood Price Logging	<code>carriers/ablerate/log_enabled</code>	Select	Default, Website, Store view
