| Advanced Config

Advanced Config controls the shared Pricesystem selection rule for the system, customer groups and individual customers. It does not replace the Category Price rule that chooses between customer and group category records.

```
composer require mageb2b/pricesystem-advancedconfig:*  
php bin/magento setup:upgrade  
php bin/magento cache:flush
```

See [Pricesystem Advanced Config](#) for customer overrides, customer-group overrides and formulas. Category Price participates under the `categoryprice` code.
