# Sample data

The sample packages create shared demonstration customers, products and categories, then add customer and group category price examples. They are intended for development and disposable demos.

```
composer require mageb2b/pricesystem-sample-data:*
composer require mageb2b/pricesystem-categoryprice-sample-data:*
php bin/magento setup:upgrade
php bin/magento cache:flush
```

```
php bin/magento sampledata:verify:pricesystem-categoryprice
php bin/magento sampledata:reset:pricesystem-categoryprice
```

The reset command removes records owned by the Category Price sample package. Do not run it against production data. See Pricesystem sample data for the shared fixtures.
