Sort Order Strategy

Category Specific Prices · /categoryprice/price-selection/sort-order-strategy

When the global "Price Select Rule" is set to **Sort order**, Pricesystem selects the first available price from your configured priority list.

To prioritize category pricing, include `categoryprice` near the top.

How The Selection Works

1. Pricesystem builds a map of candidate prices by price code.
2. It iterates the configured `price_sort_order` list from top to bottom.
3. The first price code that exists and has a valid value is selected.
4. If nothing matches, it falls back to `orig_price` (Magento original price).

Skip Zero Price

If `pricesystem/price_calculation/skip_zero_price` = Yes, any price that resolves to `0.00` (or lower) is treated as "not set" and skipped.
