Installation

Customer Documents Extension · /customerdocuments/addons/csv_import_export/installation

Install the Import/Export add-on for Customer Documents.

Requirements

- Customer Documents Extension installed
- Magento 2.4.0 or higher
- PHP 8.1+

Installation

```
composer config bearer.repo.softwaresilo.io <token>
composer config repositories.softwaresilo composer
https://repo.softwaresilo.io/
composer require mageb2b/customerdocuments-importexport:*
php bin/magento module:enable MageB2B_CustomerDocumentsImportExport
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento cache:flush
```

Verification

After installation, verify the add-on is active:

1. Go to **System > Data Transfer > Export** and confirm “Customer Documents” is available as entity
2. Go to **System > Data Transfer > Import** and confirm “Customer Documents” is available as entity
3. Download the sample CSV for this entity and run a small test import
