Sidebar Documents

Enable **Enable at sidebar** to render the Customer Documents block in Magento's `sidebar.additional` area. A document must also have **Show in Sidebar** enabled and be accessible to the current customer.

The exact position depends on the active theme and page layout. Test the block on the pages where your theme renders the additional sidebar. If the theme does not provide that layout area, the setting cannot create one on its own.

Use the sidebar for a small set of timely documents. The full searchable library remains available in My Documents.
