Seller Identity

Beyond VAT ID and tax number, e-invoices can carry additional seller identifiers used by particular recipients and routing systems. Populate an identifier only when you know who issued it and which scheme the receiver expects.

Fields

Stores > Configuration > MageB2B > E-Invoice > Company Information

Field	Scheme	Use Case	Where it lands
VAT ID	Not set	Seller tax identification used by the formatters	<code>Seller / SpecifiedTaxRegistration (VA)</code>
Tax Number	Not set	German Steuernummer	<code>Seller / SpecifiedTaxRegistration (FC)</code>
Company Registration Number	Not set	HRB / HRA	<code>Seller / LegalOrganization / ID</code>
SIRET Number	Not set	French businesses (Factur-X)	<code>Seller / SpecifiedTaxRegistration (FC)</code>
Seller Trading Name (BT-28)	Not set	Alternative business name	<code>Seller / LegalOrganization / TradingBusinessName (CII) / LegalEntity / RegistrationName (UBL)</code>
Seller GLN	0088	GS1 Global Location Number for logistics/PEPPOL	<code>Seller / GlobalID</code>
Seller DUNS Number	0060	Dun & Bradstreet identifier for international B2B	<code>Seller / GlobalID</code>
Seller Leitweg-ID	0204	Used when the seller itself is a public entity	<code>Seller / GlobalID (XRechnung only)</code>

Field	Scheme	Use Case	Where it lands
Seller Contact (Name/Phone/Email)	Not set	Required for XRechnung (BR-DE-2, PEPPOL-R020)	Seller / DefinedTradeContact

Requirements vary by format and receiver. The module's company-data check validates its local rules; the recipient may require additional identifiers.

Tax Representative (BG-11 / BT-63)

The module can declare a fiscal representative for a seller configuration that requires one. Whether a representative is legally needed is an accounting/legal decision outside the extension.

Stores > Configuration > MageB2B > E-Invoice > Tax Representative

Setting	Notes
Enable Tax Representative	Master switch, off by default
Representative Name	Legal entity name
Representative VAT ID (BT-63)	Mandatory
Street / Postcode / City / Country	Address of the representative

The tax representative is only emitted for profiles that support BG-11:

Format	Supports BG-11?
EN16931	Yes
XRechnung	Yes
ZUGFeRD EN16931 / Extended	Yes
Factur-X EN16931 / Extended	Yes
ZUGFeRD Minimum / Basic / BASIC WL	No (not in schema)
PEPPOL BIS Billing 3.0	Yes

Best Practices

1. Leave GLN and DUNS empty unless a counterpart or delivery provider explicitly asks for them.
2. Fill in **Seller Trading Name** if your marketing name differs from the legal name on

the commercial register.

3. If you already use a Leitweg-ID for buyers and occasionally sell as a public entity yourself, set the seller-side Leitweg-ID under this section.
4. Fiscal representative data is visible on every invoice. Enable it only when you actually have one.
