Configuration Fields

This reference lists the settings exposed by `mageb2b/e-invoice` in Magento Admin.

Configuration paths are included for controlled deployments and `config:set`. Use Magento Admin for normal changes so field validation and scope inheritance still apply. The extension status display is not listed because it reports installation state rather than a configurable value.

General Settings

Field	Configuration path	Input	Scope
Enable E-Invoicing	<code>einvoice/general/enabled</code>	Select	Default, Website, Store view
Default B2B Format	<code>einvoice/general/default_format</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/general/default_format` is available when `einvoice/general/enabled` is 1.

Invoice Settings

Field	Configuration path	Input	Scope
Generation Mode	<code>einvoice/invoice_settings/generation_mode</code>	Select	Default, Website, Store view
Generation Trigger	<code>einvoice/invoice_settings/generation_trigger</code>	Select	Default, Website, Store view
Document Type Code	<code>einvoice/invoice_settings/document_type</code>	Select	Default, Website, Store view
Block Invoice on E-Invoice Error	<code>einvoice/invoice_settings/block_on_error</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Attach E-Invoice to Invoice Email	<code>einvoice/invoice_settings/attach_to_email</code>	Select	Default, Website, Store view
Attachment Strategy	<code>einvoice/invoice_settings/attachment_strategy</code>	Select	Default, Website, Store view
Scheduled Batch Size	<code>einvoice/invoice_settings/scheduled_batch_size</code>	Text	Default, Website, Store view
Recovery Timeout (Minutes)	<code>einvoice/invoice_settings/recovery_timeout_minutes</code>	Text	Default, Website, Store view
Invoice Filename Pattern	<code>einvoice/invoice_settings/filename_pattern</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/invoice_settings/generation_mode` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/generation_trigger` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/document_type` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/block_on_error` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/attach_to_email` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/attachment_strategy` is available when `einvoice/invoice_settings/attach_to_email` is 1.
- `einvoice/invoice_settings/attachment_strategy` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/scheduled_batch_size` is available when `einvoice/invoice_settings/generation_mode` is `scheduled`.
- `einvoice/invoice_settings/scheduled_batch_size` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/recovery_timeout_minutes` is available when `einvoice/general/enabled` is 1.
- `einvoice/invoice_settings/filename_pattern` is available when `einvoice/general/enabled` is 1.

Payment Terms Mapping

Field	Configuration path	Input	Scope
Default Payment Terms Template	<code>einvoice/payment_terms/default_terms_template</code>	Text area	Default, Website, Store view
Default Payment Means Code	<code>einvoice/payment_terms/default_payment_means_code</code>	Text	Default, Website, Store view
Default Payment Means Code (No IBAN)	<code>einvoice/payment_terms/default_payment_means_code_no_iban</code>	Text	Default, Website, Store view
Payment Method Mapping	<code>einvoice/payment_terms/mapping</code>	Custom control	Default, Website, Store view

Visibility dependencies:

- `einvoice/payment_terms/default_terms_template` is available when `einvoice/general/enabled` is 1.
- `einvoice/payment_terms/default_payment_means_code` is available when `einvoice/general/enabled` is 1.
- `einvoice/payment_terms/default_payment_means_code_no_iban` is available when `einvoice/general/enabled` is 1.
- `einvoice/payment_terms/mapping` is available when `einvoice/general/enabled` is 1.

Accounting

Field	Configuration path	Input	Scope
Accounting Source Type	<code>einvoice/accounting/source_type</code>	Select	Default, Website, Store view
Order Item Field	<code>einvoice/accounting/order_item_field</code>	Select	Default, Website, Store view
Product Attribute	<code>einvoice/accounting/product_attribute</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Customer Attribute	<code>einvoice/accounting/customer_attribute</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/accounting/source_type` is available when `einvoice/general/enabled` is 1.
- `einvoice/accounting/order_item_field` is available when `einvoice/accounting/source_type` is `order_item_field`.
- `einvoice/accounting/order_item_field` is available when `einvoice/general/enabled` is 1.
- `einvoice/accounting/product_attribute` is available when `einvoice/accounting/source_type` is `product_attribute`.
- `einvoice/accounting/product_attribute` is available when `einvoice/general/enabled` is 1.
- `einvoice/accounting/customer_attribute` is available when `einvoice/accounting/source_type` is `customer_attribute`.
- `einvoice/accounting/customer_attribute` is available when `einvoice/general/enabled` is 1.

Credit Memo Settings

Field	Configuration path	Input	Scope
Enable E-Invoice for Credit Memos	<code>einvoice/creditmemo_settings/enabled</code>	Select	Default, Website, Store view
Generation Mode	<code>einvoice/creditmemo_settings/generation_mode</code>	Select	Default, Website, Store view
Generation Trigger	<code>einvoice/creditmemo_settings/generation_trigger</code>	Select	Default, Website, Store view
Document Type Code	<code>einvoice/creditmemo_settings/document_type</code>	Select	Default, Website, Store view
Block Credit Memo on E-Invoice Error	<code>einvoice/creditmemo_settings/block_on_error</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Attach E-Invoice to Credit Memo Email	<code>einvoice/creditmemo_settings/attach_to_email</code>	Select	Default, Website, Store view
Attachment Strategy	<code>einvoice/creditmemo_settings/attachment_strategy</code>	Select	Default, Website, Store view
Scheduled Batch Size	<code>einvoice/creditmemo_settings/scheduled_batch_size</code>	Text	Default, Website, Store view
Recovery Timeout (Minutes)	<code>einvoice/creditmemo_settings/recovery_timeout_minutes</code>	Text	Default, Website, Store view
Credit Memo Filename Pattern	<code>einvoice/creditmemo_settings/filename_pattern</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/creditmemo_settings/enabled` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/generation_mode` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/generation_mode` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/generation_trigger` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/generation_trigger` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/document_type` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/document_type` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/block_on_error` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/block_on_error` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/attach_to_email` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/attach_to_email` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/attachment_strategy` is available when

`einvoice/creditmemo_settings/attach_to_email` is 1.

- `einvoice/creditmemo_settings/attachment_strategy` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/attachment_strategy` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/scheduled_batch_size` is available when `einvoice/creditmemo_settings/generation_mode` is `scheduled`.
- `einvoice/creditmemo_settings/scheduled_batch_size` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/scheduled_batch_size` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/recovery_timeout_minutes` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/recovery_timeout_minutes` is available when `einvoice/general/enabled` is 1.
- `einvoice/creditmemo_settings/filename_pattern` is available when `einvoice/creditmemo_settings/enabled` is 1.
- `einvoice/creditmemo_settings/filename_pattern` is available when `einvoice/general/enabled` is 1.

Document Storage

Field	Configuration path	Input	Scope
Storage Strategy	<code>einvoice/storage/storage_strategy</code>	Select	Default, Website, Store view
File Storage Path	<code>einvoice/storage/file_storage_path</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/storage/storage_strategy` is available when `einvoice/general/enabled` is 1.
- `einvoice/storage/file_storage_path` is available when `einvoice/storage/storage_strategy` is `permanent`.
- `einvoice/storage/file_storage_path` is available when `einvoice/general/enabled` is 1.

Company Information

Field	Configuration path	Input	Scope
VAT ID	<code>einvoice/company/vat_id</code>	Text	Default, Website, Store view
Tax Number	<code>einvoice/company/tax_number</code>	Text	Default, Website, Store view
Company Registration Number	<code>einvoice/company/registration_number</code>	Text	Default, Website, Store view
Company Registration Scheme	<code>einvoice/company/registration_scheme</code>	Select	Default, Website, Store view
SIRET Number	<code>einvoice/company/siret_number</code>	Text	Default, Website, Store view
Bank IBAN	<code>einvoice/company/bank_iban</code>	Text	Default, Website, Store view
Bank BIC/SWIFT	<code>einvoice/company/bank_bic</code>	Text	Default, Website, Store view
Default Payment Terms (Days)	<code>einvoice/company/payment_terms_days</code>	Text	Default, Website, Store view
Seller Contact Name	<code>einvoice/company/seller_contact_name</code>	Text	Default, Website, Store view
Seller Contact Department	<code>einvoice/company/seller_contact_department</code>	Text	Default, Website, Store view
Seller Contact Phone	<code>einvoice/company/seller_contact_phone</code>	Text	Default, Website, Store view

Field	Configuration path	Input	Scope
Seller Contact Email	<code>einvoice/company/seller_contact_email</code>	Text	Default, Website, Store view
Seller Trading Name	<code>einvoice/company/seller_trading_name</code>	Text	Default, Website, Store view
Seller GLN	<code>einvoice/company/seller_gln</code>	Text	Default, Website, Store view
Seller DUNS Number	<code>einvoice/company/seller_duns</code>	Text	Default, Website, Store view
Seller Leitweg-ID	<code>einvoice/company/seller_leitweg_id</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/company/vat_id` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/tax_number` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/registration_number` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/registration_scheme` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/siret_number` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/bank_iban` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/bank_bic` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/payment_terms_days` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_contact_name` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_contact_department` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_contact_phone` is available when `einvoice/general/enabled` is 1.

- `einvoice/company/seller_contact_email` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_trading_name` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_gln` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_duns` is available when `einvoice/general/enabled` is 1.
- `einvoice/company/seller_leitweg_id` is available when `einvoice/general/enabled` is 1.

Tax Representative

Field	Configuration path	Input	Scope
Enable Tax Representative	<code>einvoice/tax_representative/enabled</code>	Select	Default, Website, Store view
Representative Name	<code>einvoice/tax_representative/name</code>	Text	Default, Website, Store view
Representative VAT ID	<code>einvoice/tax_representative/vat_id</code>	Text	Default, Website, Store view
Street	<code>einvoice/tax_representative/street</code>	Text	Default, Website, Store view
Postcode	<code>einvoice/tax_representative/postcode</code>	Text	Default, Website, Store view
City	<code>einvoice/tax_representative/city</code>	Text	Default, Website, Store view
Country	<code>einvoice/tax_representative/country</code>	Select	Default, Website, Store view

Visibility dependencies:

- `invoice/tax_representative/enabled` is available when `invoice/general/enabled` is 1.
- `invoice/tax_representative/name` is available when `invoice/tax_representative/enabled` is 1.
- `invoice/tax_representative/name` is available when `invoice/general/enabled` is 1.
- `invoice/tax_representative/vat_id` is available when `invoice/tax_representative/enabled` is 1.
- `invoice/tax_representative/vat_id` is available when `invoice/general/enabled` is 1.
- `invoice/tax_representative/street` is available when `invoice/tax_representative/enabled` is 1.
- `invoice/tax_representative/street` is available when `invoice/general/enabled` is 1.
- `invoice/tax_representative/postcode` is available when `invoice/tax_representative/enabled` is 1.
- `invoice/tax_representative/postcode` is available when `invoice/general/enabled` is 1.
- `invoice/tax_representative/city` is available when `invoice/tax_representative/enabled` is 1.
- `invoice/tax_representative/city` is available when `invoice/general/enabled` is 1.
- `invoice/tax_representative/country` is available when `invoice/tax_representative/enabled` is 1.
- `invoice/tax_representative/country` is available when `invoice/general/enabled` is 1.

VAT Classification

Field	Configuration path	Input	Scope
Kleinunternehmer (§19 UStG)	<code>invoice/vat/kleinunternehmer</code>	Select	Default, Website, Store view
Default Category for 0% Lines	<code>invoice/vat/default_zero_rate_category</code>	Select	Default, Website, Store view
Treat Magento Giftcards as Multi-Purpose Voucher	<code>invoice/vat/giftcard_multi_purpose</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Voucher Override Product Attribute	<code>einvoice/vat/voucher_product_attribute</code>	Text	Default, Website, Store view
Exemption Reason: Intra-Community (K)	<code>einvoice/vat/exemption_reason_k</code>	Text	Default, Website, Store view
Exemption Reason: Export (G)	<code>einvoice/vat/exemption_reason_g</code>	Text	Default, Website, Store view
Exemption Reason: Exempt (E)	<code>einvoice/vat/exemption_reason_e</code>	Text	Default, Website, Store view
Exemption Reason: Reverse Charge (AE)	<code>einvoice/vat/exemption_reason_ae</code>	Text	Default, Website, Store view
Exemption Reason: Out of Scope (O)	<code>einvoice/vat/exemption_reason_o</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/vat/kleinunternehmer` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/default_zero_rate_category` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/giftcard_multi_purpose` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/voucher_product_attribute` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/exemption_reason_k` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/exemption_reason_g` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/exemption_reason_e` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/exemption_reason_ae` is available when `einvoice/general/enabled` is 1.
- `einvoice/vat/exemption_reason_o` is available when

`einvoice/general/enabled` is 1.

Document References

Field	Configuration path	Input	Scope
Project Reference (BT-11)	<code>einvoice/references/project_reference</code>	Select	Default, Website, Store view
Purchase Order Reference (BT-13)	<code>einvoice/references/buyer_order_reference</code>	Select	Default, Website, Store view
Sales Order Reference (BT-14)	<code>einvoice/references/seller_order_reference</code>	Select	Default, Website, Store view
Buyer Identifier (BT-46)	<code>einvoice/references/buyer_identifier</code>	Select	Default, Website, Store view
Buyer Identifier Scheme	<code>einvoice/references/buyer_identifier_scheme</code>	Select	Default, Website, Store view
Buyer Legal Registration Identifier (BT-47)	<code>einvoice/references/buyer_legal_registration_identifier</code>	Select	Default, Website, Store view
Buyer Legal Registration Scheme	<code>einvoice/references/buyer_legal_registration_identifier_scheme</code>	Select	Default, Website, Store view
Include Order Customer Note (BT-22)	<code>einvoice/references/include_order_customer_note</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/references/include_order_customer_note` is available when `einvoice/general/enabled` is 1.

Prepayments and Redeemed Credit

Field	Configuration path	Input	Scope
Invoice Prepaid Amount Field (BT-113)	<code>einvoice/prepayment/invoice_amount_field</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Credit Memo Prepaid Amount Field (BT-113)	<code>einvoice/prepayment/creditmemo_amount_field</code>	Select	Default, Website, Store view

Invoice Items

Field	Configuration path	Input	Scope
Include Configurable Product Options (BT-154)	<code>einvoice/item/include_configurable_options</code>	Select	Default, Website, Store view
Use Selected Simple Product Name (BT-153)	<code>einvoice/item/use_simple_product_name</code>	Select	Default, Website, Store view
Default Item Unit Code	<code>einvoice/item/default_unit_code</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/item/include_configurable_options` is available when `einvoice/general/enabled` is 1.
- `einvoice/item/use_simple_product_name` is available when `einvoice/general/enabled` is 1.
- `einvoice/item/default_unit_code` is available when `einvoice/general/enabled` is 1.

Native Checkout Buyer Reference

Field	Configuration path	Input	Scope
Buyer Reference / Leitweg-ID	<code>einvoice/checkout/buyer_reference_mode</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Checkout Field Label	<code>einvoice/checkout/buyer_reference_label</code>	Text	Default, Website, Store view
Checkout Help Text	<code>einvoice/checkout/buyer_reference_help</code>	Text	Default, Website, Store view
Maximum Length	<code>einvoice/checkout/buyer_reference_max_length</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/checkout/buyer_reference_mode` is available when `einvoice/general/enabled` is 1.
- `einvoice/checkout/buyer_reference_label` is available when `einvoice/checkout/buyer_reference_mode` is disabled.
- `einvoice/checkout/buyer_reference_help` is available when `einvoice/checkout/buyer_reference_mode` is disabled.
- `einvoice/checkout/buyer_reference_max_length` is available when `einvoice/checkout/buyer_reference_mode` is disabled.

Delivery and Service Date

Field	Configuration path	Input	Scope
Delivery / Service Date Source	<code>einvoice/delivery/source</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/delivery/source` is available when `einvoice/general/enabled` is 1.

Customer Account Downloads

Field	Configuration path	Input	Scope
Invoice XML	<code>einvoice/customer_download/invoice_xml</code>	Select	Default, Website, Store view

Field	Configuration path	Input	Scope
Invoice PDF	<code>einvoice/customer_download/invoice_pdf</code>	Select	Default, Website, Store view
Invoice XML ZIP	<code>einvoice/customer_download/invoice_zip</code>	Select	Default, Website, Store view
Credit Memo XML	<code>einvoice/customer_download/creditmemo_xml</code>	Select	Default, Website, Store view
Credit Memo PDF	<code>einvoice/customer_download/creditmemo_pdf</code>	Select	Default, Website, Store view

Validation & Error Handling

Field	Configuration path	Input	Scope
Validation Level	<code>einvoice/validation/validation_level</code>	Select	Default, Website, Store view
Strict XSD Validation	<code>einvoice/validation/strict_xsd_validation</code>	Select	Default, Website, Store view
Enable Error Notifications	<code>einvoice/validation/error_notification_enabled</code>	Select	Default, Website, Store view
Error Notification Email	<code>einvoice/validation/error_notification_email</code>	Text	Default, Website, Store view
Error Notification Threshold	<code>einvoice/validation/error_notification_threshold</code>	Text	Default, Website, Store view

Visibility dependencies:

- `einvoice/validation/validation_level` is available when `einvoice/general/enabled` is 1.

- `einvoice/validation/strict_xsd_validation` is available when `einvoice/general/enabled` is 1.
- `einvoice/validation/error_notification_enabled` is available when `einvoice/general/enabled` is 1.
- `einvoice/validation/error_notification_email` is available when `einvoice/validation/error_notification_enabled` is 1.
- `einvoice/validation/error_notification_email` is available when `einvoice/general/enabled` is 1.
- `einvoice/validation/error_notification_threshold` is available when `einvoice/validation/error_notification_enabled` is 1.
- `einvoice/validation/error_notification_threshold` is available when `einvoice/general/enabled` is 1.

REST API Settings

Field	Configuration path	Input	Scope
Include E-Invoice in Invoice API	<code>einvoice/api/invoice_enabled</code>	Select	Default, Website, Store view
Include E-Invoice in Credit Memo API	<code>einvoice/api/creditmemo_enabled</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/api/invoice_enabled` is available when `einvoice/general/enabled` is 1.
- `einvoice/api/creditmemo_enabled` is available when `einvoice/general/enabled` is 1.

ZUGFeRD / Factur-X Configuration

Field	Configuration path	Input	Scope
ZUGFeRD / Factur-X Profile	<code>einvoice/zugferd_config/profile</code>	Select	Default, Website, Store view

Visibility dependencies:

- `einvoice/zugferd_config/profile` is available when `einvoice/general/enabled` is 1.

PEPPOL BIS Billing 3.0

Field	Configuration path	Input	Scope
Seller Endpoint Scheme (EAS)	<code>invoice/peppol_bis/seller_endpoint_scheme</code>	Select	Default, Website, Store view
Seller Endpoint ID	<code>invoice/peppol_bis/seller_endpoint_id</code>	Text	Default, Website, Store view
CustomizationID override	<code>invoice/peppol_bis/customization_id</code>	Text	Default, Website, Store view
ProfileID override	<code>invoice/peppol_bis/profile_id</code>	Text	Default, Website, Store view

Visibility dependencies:

- `invoice/peppol_bis/seller_endpoint_scheme` is available when `invoice/general/enabled` is 1.
- `invoice/peppol_bis/seller_endpoint_id` is available when `invoice/general/enabled` is 1.
- `invoice/peppol_bis/customization_id` is available when `invoice/general/enabled` is 1.
- `invoice/peppol_bis/profile_id` is available when `invoice/general/enabled` is 1.

XRechnung Configuration

Field	Configuration path	Input	Scope
XRechnung Version	<code>invoice/xrechnung_config/version</code>	Select	Default, Website, Store view

Visibility dependencies:

- `invoice/xrechnung_config/version` is available when `invoice/general/enabled` is 1.

Configuration Testing

Field	Configuration path	Input	Scope
Test Configuration	<code>einvoice/testing/test_configuration</code>	Custom control	Default, Website, Store view
Test XSD Schemas	<code>einvoice/testing/test_schemas</code>	Custom control	Default, Website, Store view
Test Company Data	<code>einvoice/testing/test_company_data</code>	Custom control	Default, Website, Store view
