Order extras in Admin

After a successful One Step Checkout order, the Admin order view can show the values collected by the optional extras. Open **Sales > Orders**, select the matching order and review the **Checkout Extras** section.

Values shown

- **Preferred Delivery Date** is formatted for the Admin locale when the stored value uses **YYYY-MM-DD**.
- **Order Comment** is escaped and keeps line breaks.
- **Gift Message** shows sender, recipient and message when Magento stored a gift-message record for the order.

The section is omitted when all three values are empty. The newsletter choice is processed after order creation and does not appear as a checkout-extra box in this view.

The order repository also exposes **order_comment** and **delivery_date** as order extension attributes. The module does not add gift-message extension attributes in **etc/extension_attributes.xml**.
