Configuration Fields

This reference lists the settings exposed by `mageb2b/payment-profile` in Magento Admin.

Configuration paths are included for controlled deployments and `config:set`. Use Magento Admin for normal changes so field validation and scope inheritance still apply. The extension status display is not listed because it reports installation state rather than a configurable value.

General settings

Field	Configuration path	Input	Scope
Enable	<code>payment_profile/general/enabled</code>	Select	Default, Website, Store view
Hide all payment methods when no allowed method is resolved	<code>payment_profile/general/disable_no_match</code>	Select	Default, Website, Store view
