VIP Customer Benefits

Payment Profiles Documentation · </payment-profile/use-cases/vip-customer-benefits>

Provide premium payment options for VIP customers.

Scenario

VIP customers receive extended payment terms and additional payment methods.

Implementation

VIP Profile

Profile: "VIP Payments"

- Assignment: VIP customer group or individual
- Methods: All enabled
- Special: Extended payment terms

Benefits

Benefit	Standard	VIP
Invoice Payment	No	Yes
Payment Terms	Immediate	Net 30/60
Credit Limit	\$1,000	\$50,000
Purchase Order	No	Yes

Setup Steps

1. Create "VIP Payments" profile
2. Enable all desired methods
3. Set extended conditions
4. Assign to VIP group or customers

Condition Example

```
IF customer.group = "VIP" OR customer.lifetime_value > 50000  
THEN enable_methods: invoice, purchase_order  
AND set_payment_terms: net_30
```

Use this as an advanced pattern. Fields like `customer.lifetime_value` and automatic term assignment depend on available attributes/integrations in your stack.
