Configuration Fields

This reference lists the Magento Admin settings exposed by the base package and its documented add-ons: `mageb2b/pricesystem`, `mageb2b/pricesystem-advancedconfig`.

Configuration paths are included for controlled deployments and `config:set`. Use Magento Admin for normal changes so field validation and scope inheritance still apply. The extension status display is not listed because it reports installation state rather than a configurable value.

mageb2b/pricesystem

General settings

Field	Configuration path	Input	Scope
Activate pricesystem for this website	<code>pricesystem/general/active</code>	Select	Default, Website
Hide price filter from layered navigation for customers	<code>pricesystem/general/hide_price_filter</code>	Select	Default, Website, Store view

Visibility dependencies:

- `pricesystem/display/custom_prices_my_account_provider_types` is available when `pricesystem/display/custom_prices_my_account` is 1.
- `pricesystem/display/custom_prices_my_account_not_empty` is available when `pricesystem/display/custom_prices_my_account` is 1.
- `pricesystem/display/discount_text_for_cart` is available when `pricesystem/display/show_discount_text_on_cart` is 1.
- `pricesystem/display/discount_text_style_for_cart` is available when `pricesystem/display/show_discount_text_on_cart` is 1.

Price select rule settings

Field	Configuration path	Input	Scope
Price Select Rule	<code>pricesystem/price_select_rule/priceselect</code>	Select	Default
Next available price as strike through price	<code>pricesystem/price_select_rule/use_next_available_price_in_strike_through</code>	Select	Default
Skip customer and group discounts application on next available price	<code>pricesystem/price_select_rule/skip_customer_group_discounts_for_next_available_price</code>	Select	Default
Price Priority Order	<code>pricesystem/price_select_rule/price_sort_order</code>	Custom control	Default

Visibility dependencies:

- `pricesystem/price_select_rule/use_next_available_price_in_strike_through` is available when `pricesystem/price_select_rule/priceselect` is 3.
- `pricesystem/price_select_rule/skip_customer_group_discounts_for_next_available_price` is available when `pricesystem/price_select_rule/priceselect` is 3.

- `pricesystem/price_select_rule/price_sort_order` is available when `pricesystem/price_select_rule/priceselect` is 3.

API settings

Field	Configuration path	Input	Scope
Use custom API fields for sync	<code>pricesystem/api/use_custom_api_fields</code>	Select	Default
Customer attribute	<code>pricesystem/api/customer_attribute</code>	Select	Default
Customer group attribute	<code>pricesystem/api/customer_group_attribute</code>	Select	Default
Product attribute	<code>pricesystem/api/product_attribute</code>	Select	Default
Category attribute	<code>pricesystem/api/category_attribute</code>	Select	Default

Visibility dependencies:

- `pricesystem/api/customer_attribute` is available when `pricesystem/api/use_custom_api_fields` is 1.
- `pricesystem/api/customer_group_attribute` is available when `pricesystem/api/use_custom_api_fields` is 1.
- `pricesystem/api/product_attribute` is available when `pricesystem/api/use_custom_api_fields` is 1.
- `pricesystem/api/category_attribute` is available when `pricesystem/api/use_custom_api_fields` is 1.

Debug

Field	Configuration path	Input	Scope
Enable log	<code>pricesystem/debug/enable_log</code>	Select	Default

mageb2b/pricesystem-advancedconfig

Advanced settings

Field	Configuration path	Input	Scope
Default value for discountable	<code>pricesystem/advanced/default_discountable</code>	Select	Default, Website

Field	Configuration path	Input	Scope
Select pricetypes for which discountable check will be applied	<code>pricesystem/advanced/discountable_restricted_pricetypes</code>	Multi-select	Default, Website
Discountable check for additional Customer/Group Discount	<code>pricesystem/advanced/force_discountable_discount_check</code>	Select	Default, Website
